

Lower Mainland Flood Management Strategy

Fraser River Flood Scenarios Map

A Map Showing Estimated Flood Extents for:

Scenario C (Present Day)

Scenario D (Year 2100)  
– Further Extent of Flooding

Existing Waterways

First Nations Reserves & Treaty Lands  
Each First Nation is identified in one community location, though there may be more than one location/reserve on the map associated with that First Nation.

Municipal Boundaries (white line)

Highways

– – Rail & Shipping Connections

For more detail, including some essential facilities located in floodplain areas, see regional and subregional maps in the report *Regional Assessment of Flood Vulnerability*.

These maps will also be posted separately at [floodstrategy.ca](http://floodstrategy.ca).

Note on Map: All maps prepared for this project are for general illustration purposes at a regional scale. They are not floodplain maps and do not have official designation of floodplains. For this reason, they should not be used for site-specific flood management planning. See the full vulnerability assessment report for more detailed maps and explanation on use.
