

Lower Mainland Flood Management Strategy

Coastal Flood Scenarios Map

A Map Showing Estimated
Flood Extents for:

Scenario A (Present Day)

Scenario B (Year 2100)
– Further Extent of Flooding

Existing Waterways

First Nations Reserves & Treaty Lands
Each First Nation is identified in one community location, though there may be more than one location/reserve on the map associated with that First Nation.

Municipal Boundaries (white line)

Highways

Rail & Shipping Connections

0 5km
N

For more detail, including some essential
facilities located in floodplain areas, see
regional and subregional maps in the report
Regional Assessment of Flood Vulnerability.

These maps will also be posted separately
at floodstrategy.ca.

Note on Map: All maps prepared for this project are for general
illustration purposes at a regional scale. They are not floodplain
maps and do not have official designation of floodplains. For
this reason, they should not be used for site-specific flood
management planning. See the full vulnerability assessment
report for more detailed maps and explanation on use.
